Subject: IC229H low audio problem
To: info-hams@ucsd.edu

When I first got my 229H a few years back, I got reports of low audio. So, I called that great Icom center in Atlanta, and asked the nice man where the deviation pot was, so I could turn up the gain. He explained that it was an unnecessary step, as many 229s had left the factory with that problem, and the solution was easy. They had put a too-low value zener diode across the electret microphone element, and it needed to be changed (It was a 5 volt, should have been a 9 volt, I think). He offered to change it if I sent the radio in, or allowed that I could change it myself. I agreed to try it. He told me what screws to remove, I did, there was the diode. I unsoldered it, and replaced it with a radio shack zener. A 10 minute job, and my audio now gets good reports. Call Icom, and ask their help.

Anyone in Montana willing to make a sched with me for WAS? I've

never even heard Montana on the air. I usually work 17 and 20. I can meet someone on those bands or any of the other HF bands, cw or phone. How about a little help?

Thanks.

>>>My question is: If I walk into Radio Shack, put money down, and say:
>>> "Gimme dat HT-202, and I'll give you this money", can
>>> (would) they ask to see a license before selling it to me?

>>>On the bottom of page 28 of their 93 catalog, it states:
>>>YOU MUST HAVE A CURRENT FCC AMATEUR LICENSE OF APPROPRIATE CLASS
>>>TO TRANSMIT WITH THE HTX-100 and HTX-202.

>>>I would think re-iteration of the above would be all RS should do, since
>>>the ultimate responsibility is mine to abide by the rules.

>>> Comments? Experiences?

Radio shack would sell you 20 of the ht's. They are required to make the statement about licensing and will even help you find a vec, but they do not check to see if you are licenced before you pick up the radio.

Btw- it is a great radio. I use it for my packer mailbox.

Subject: ROTA Weather-Fax station

To: info-hams@ucsd.edu

Hi,

This winter I have received very nice and very useful weather-fax from the Rota station (Spain). But since several weeks I can't get any signal. I would like some informations about this station. Have they changed frequencies or stopped to transmit ?

Thanks in advance,

Patrick
